## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 3\_Q4

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Sesha is developing a weather monitoring system for a region with multiple weather stations. Each weather station collects temperature data hourly and stores it in a 2D array.

Write a program that can add the temperature data from two different weather stations to create a combined temperature record for the region.

##### ***Input Format***

The first line of input consists of two space-separated integers N and M, representing the number of rows and columns of the matrices, respectively.

The next N lines consist of M space-separated integers, representing the values of the first matrix.

The following N lines consist of M space-separated integers, representing the values of the second matrix.

### ***Output Format***

The output prints the addition of the two matrices in N rows and M columns, representing the combined temperature record.

Refer to the sample output for formatting specifications.

### ***Sample Test Case***

Input: 3 3

1 2 3

4 5 6

7 8 9

1 1 1

2 2 2

3 3 3

Output: 2 3 4

6 7 8

10 11 12

### ***Answer***

```
// You are using Java
import java.util.*;
class main{
    public static void main(String[]args){
        Scanner scan=new Scanner(System.in);
        int n=scan.nextInt();
        int m=scan.nextInt();
        int[][] num1=new int[n][m];
        int[][] num2=new int[n][m];
        for(int i=0;i<n;i++){
            for(int j=0;j<m;j++){
                num1[i][j]=scan.nextInt();
            }
        }
        for(int i=0;i<n;i++){
            for(int j=0;j<m;j++){
                num2[i][j]=scan.nextInt();
            }
        }
        for(int i=0;i<n;i++){
            for(int j=0;j<m;j++){
                System.out.print(num1[i][j]+num2[i][j] + " ");
            }
            System.out.println();
        }
    }
}
```

```
        }
        int[][] re=new int[n][m];
        for(int i=0;i<n;i++){
            for(int j=0;j<m;j++){
                re[i][j]=num1[i][j]+num2[i][j];
            }
        }
        for(int i=0;i<n;i++){
            for(int j=0;j<m;j++){
                System.out.print(re[i][j]+" ");
            }
            System.out.println();
        }
    }
}
```

**Status :** Correct

**Marks :** 10/10
